Summary — B.Tech (IT) graduate with 5+ months of production-level full-stack experience at SeaNeB Technologies. Specialized in scalable multi-role web platforms (PERN stack), RESTful APIs, secure authentication systems, and responsive UI/UX, with strong exposure to modern development workflows, debugging, problem-solving, and collaborative Git-based workflows.

Education

G H Patel College of Engineering & Technology, CVM University <i>Bachelor of Technology — Information Technology · CGPA : 7.58</i>	2022 – 2026
Jay Ambe Group of Schools <i>Class 11 & 12 — Science Stream, Gujarat Board</i>	2021 – 2022

Experience

SeaNeB Technologies Pvt. Ltd. — Full Stack Developer Intern <i>Anand, Gujarat (On-site) · Link</i>	Dec 2025 – Jun 2026
- Architected and shipped a dual-domain Next.js 14 multi-role platform (TiffinService) with role-based access across Normal Users, End Users, and TSPs. - Designed a stateless tri-token auth system (access / refresh / CSRF) with SSO, and cross-domain cookie strategy, debugged and resolved 4+ SSO edge-case production failures.. - Delivered subscription-aware TSP dashboard with Tiffin & Menu CRUD, plan-gated feature access, saved address management, and skeleton-based conditional loaders. - Resolved 20+ production bugs across two repos — SSO race conditions, phone formatting, whitespace edge cases, tab-key ally, and footer nav regressions — tracked via GitHub Issues. - Led codebase-wide refactor: centralised icon registry, standardised API error contracts, restructured monorepo folder architecture; enforced via PR reviews and branching conventions.	

Projects

AUTH Tutorial — Full-Stack Authentication System React.js, Node.js, Express.js, MongoDB, JWT, bcrypt.js github.com/ayan-x1/Auth-Tutorial	
Built a MERN auth system with JWT login, bcrypt password hashing, OTP verification, role-aware dashboard, and protected route middleware.	
Blogs-Buzz — Full-Stack Blogging Platform React.js, Node.js, Express.js, MongoDB, REST API, Vercel github.com/ayan-x1/Blogs-Buzz	
Engineered a MERN blogging platform with secure auth, third-party REST API for live content, React Router navigation, and Vercel CI/CD deployment.	

Achievements

- Intern of the Month — Feb 2026**, SeaNeB Technologies — awarded by CEO Rohan Patel for outstanding technical contribution to the TiffinService platform. [Link](#)

Certifications

- NPTEL — Cloud Computing**, SWAYAM / IIT Kharagpur [Certificate](#)
- Industrial Internship Certificate** — SeaNeB Technologies Pvt. Ltd. [Certificate](#)

Technical Skills

Languages	C/C++, Python, PHP, JavaScript (ES6+), Type-Script	Databases	PostgreSQL, MongoDB
Frontend	React.js, Next.js, Tailwind CSS, HTML5, CSS3, React Native, Angular.js, Bootstrap, Shaden UI	DevOps	Git & GitHub, Docker, Postman, Vercel, Railway, Figma, Agile/Scrum
Backend	Node.js, Express.js, ASP .NET Core, JWT Auth, WebSockets, RESTful APIs	Testing	Jenkins, Swagger.io API
		Others	Redux Toolkit, Zustand, Cloudinary, Zod, RazorPay & Cashfree APIs
